

For Immediate Release

Compusult Team Awarded Prime Contract with NGA for iSToRE II

January 13, 2025

Chantilly, VA – Compusult Systems Inc. (wholly-owned US subsidiary of Compusult Limited) teamed with Compusult Limited (Headquarters, Mount Pearl, Canada) is thrilled to announce its selection by the U.S. National Geospatial-Intelligence Agency (NGA) to develop and implement its next-generation Information Store (iSToRE II). This contract underscores Compusult's commitment to advancing geospatial intelligence technologies for clients worldwide.

Celebrating 40 years of innovation in 2025, Compusult has earned a reputation for delivering cutting-edge solutions tailored to meet evolving organizational needs. The iSToRE II project will enhance NGA's capabilities, providing advanced tools for archiving, discovering, retrieving, and disseminating geospatial intelligence (GEOINT).

"This contract demonstrates the trust placed in Compusult to deliver sophisticated geospatial intelligence solutions," said Michael Kennedy, President of Compusult Systems Inc. "Our team is eager to collaborate with NGA to ensure iSToRE II exceeds expectations and provides enduring value to their mission-critical operations to over 200 locations worldwide."

iSToRE II will integrate seamlessly with NGA's existing systems while offering scalability for future functionalities. Powered by Compusult's Web Enterprise Suite (WES) software, the solution combines geospatial data discovery, management, and analysis in a secure, standards-based environment. WES supports diverse operational needs, from rugged field deployments to enterprise-level servers, enabling visualization in both 2D and 3D contexts.

The core benefits of WES include:

- Streamlined geospatial data access and visualization.
- Enhanced interoperability with legacy systems.
- Advanced tools for incident management and operational planning.
- Secure, browser-based access for global collaboration.

Compusult's innovative approach will ensure that iSToRE II meets NGA's objectives, fostering improved decision-making and operational efficiency.
