ALLAIRE M.-A.	Demonstration of the Feasibility of a New Mechanical Method of Cable De-Icing
ALLAIRE M.-A.	Ice Shedding of 200 m-Long Artificially Iced Overhead Cables at an Outdoor Test Site
BEISSWENGER A.	Icephobic Material Centrifuge Adhesion Test
BENNY J.	Hydro-Québec TransÉnergie Line Conductor De-Icing Techniques
BERGERON A.	On-Load Network De-icer for HV Transmission Lines
BHUYAN G. S.	An Approach for Quantifying Structural Reliability of Overhead Structures and Its Application in Assessing Risk of Transmission Lines
BOUCHARD D.	Development of a Portable De-Icing Device for Overhead Ground Wires
BOUCHARD D.	Using Steam to De-Ice Energized Substation Disconnect Switch
BOUCHARD G.	Modeling a Water Flow on an Icing Surface
BROCHU J.	On-Load Network De-icer for HV Transmission Lines
CHISHOLM W. A.	Effects of Wind Speed on the Accumulation Rate of Pollution on Outdoor Insulators under Winter Conditions
CHOUINARD L.	Design Winds During Ice Storm as a Function of Direction For Transmission Lines
CHOUINARD L.	Rate of Ice Accumulation During Ice Storms
CLOUTIER R.	Hydro-Québec TransÉnergie Line Conductor De-Icing Techniques
CLOUTIER R.	On-Load Network De-icer for HV Transmission Lines
COROIU N.	Diminishing the Impact of Meteorological Factors on Overhead Electrical Lines
DÉRY A.	Hydro-Québec-TransÉnergie's Lévis Substation De-Icing Project
DUTIL A.	Hydro-Québec TransÉnergie Line Conductor De-Icing Techniques
DUTIL A.	Performance Aspects of Lévis Substation DC De-Icing Project
ESKANDARIAN M.	Texture and Fabric Characteristics of Atmospheric Ice Deposits on Overhead Power Lines
FAROKHI S.	Deicing of Medium Voltage Power Transmission Lines by Joule Heating Method
FARZANEH M.	A Theoretical Model for Measuring Stress Induced by a Vibrating load at Ice/Material Interface
FARZANEH M.	Characterization of Icing Events Based on Statistical Analysis of Field Data
FARZANEH M.	De-icing/Anti-icing Techniques for Power Lines: Current Methods and Future Direction
FARZANEH M.	Dynamics of Streamer on Ice Surfaces
FARZANEH M.	Effects of Wind Speed on the Accumulation Rate of Pollution on Outdoor Insulators under Winter Conditions
FARZANEH M.	Electrical Behavior of Snow Accumulated on a Post Insulator under AC High Voltage
FARZANEH M.	Flashover Performance of Station Post Insulators under Icing Conditions based on Electric Field Distribution
FARZANEH M.	Full-Scale 3D Numerical and Laboratory Simulations of Glaze Ice Accretion on a Non-Energized Station Post Insulator
FARZANEH M.	Hydrophobicity of Fluoroalkylsilane and Alkylsilane-Grafted Surfaces
FARZANEH M.	Influence of Air-Gap Length and Position on the Flashover Performance of Ice-Covered Insulators under Switching Overvoltage
FARZANEH M.	Laboratory Measurements of Turbulence in an Icing Wind Tunnel using a Hot-Wire Anemometer
FARZANEH M.	Modeling a Water Flow on an Icing Surface
FARZANEH M.	Modeling the Dynamics of Overhead Cables with Ice

FARZANEH M.	Power Line Conductor Icing Prevention by the Joule Effect: Parametric Analysis and Energy Requirements
FARZANEH M.	Prediction of the Flashover Performance of Ice-Covered Insulators
FARZANEH M.	Process and Modeling of AC Arc Development on an Ice Surface
FARZANEH M.	Temporal and Frequency Study of the Evolution of the Waveform of the Leakage Current of the Ice-Covered Insulators
FARZANEH M.	Texture and Fabric Characteristics of Atmospheric Ice Deposits on Overhead Power Lines
FARZANEH M.	The Role of Droplet Collision, Evaporation and Gravitational Settling in the Modeling of Two-Phase Flows under Icing Conditions
FARZANEH M.	Three-dimensional Morphogenetic Model of Ice Accretion on a Non-rotating Cylinder
FARZANEH-DEHKORDI J.	Prediction of the Flashover Performance of Ice-Covered Insulators
FEKNOUS N.	Design Winds During Ice Storm as a Function of Direction For Transmission Lines
FEKNOUS N.	Rate of Ice Accumulation During Ice Storms
FIKKE S.	Collecting and Using Weather Data for the Design of Overhead Lines According to IEC 60826
FIKKE S. M.	COST Action 727: Measuring and Forecasting Atmospheric Icing on Structures
FIKKE S. M.	Modern Meteorology and Atmospheric Icing
FLAZI S.	Factors Affecting the Breakdown of Air Gap Between a Discharge and Ice-Plane or Wet-Plane Surfaces
FOFANA I.	Dynamics of Streamer on Ice Surfaces
FOFANA I.	Process and Modeling of AC Arc Development on an Ice Surface
FOREST T.W.	Estimating Marine Icing on Offshore Structures using RIGICE04
FORTIN G.	Behaviour and Modeling of Cup Anemometers under Icing Conditions
FU P.	Modeling a Water Flow on an Icing Surface
FUMOTO K.	A Study on Freezing of Supercooled Water Droplet Impacting on Solid Surfaces
GAGNON D.	Ice Shedding of 200 m-Long Artificially Iced Overhead Cables at an Outdoor Test Site
GAGNON D.	Theoretical Assessment of Ice Loading of Cables as a Function of their Torsional Stiffness
GAGNON R.	Estimating Marine Icing on Offshore Structures using RIGICE04
GHANNOUM E.	Collecting and Using Weather Data for the Design of Overhead Lines According to IEC 60826
GINGRAS J.-P.	Hydro-Québec-TransÉnergie's Lévis Substation De-Icing Project
GOIA M. L	Diminishing the Impact of Meteorological Factors on Overhead Electrical Lines
GRANGER M.	Performance Aspects of Lévis Substation DC De-Icing Project
GRIMUD G.	Automated Wind-Icing Monitoring System
GRIMUD G.	Damageability of Overhead Lines During Ice Storms in Ukraine
GUERRERO T.	Influence of Air-Gap Length and Position on the Flashover Performance of Ice-Covered Insulators under Switching Overvoltage
GUILBAULT P.	Determination of Current Required to De-Ice Transmission Lines Conductors
GUTMAN I.	Flashover Performance of a T-Shaped Circuit Breaker Under Snow Conditions
HADI H.	Factors Affecting the Breakdown of Air Gap Between a Discharge and Ice-Plane or Wet-Plane Surfaces
HAMEL M.	Development of a Portable De-Icing Device for Overhead Ground Wires
HARDY C.	Theoretical Assessment of Ice Loading of Cables as a Function of their Torsional Stiffness
HAVARD D.	Amirkabir University of Technology Part II: Field Data on Conductor Galloping, Ice Shedding, and Bundle Rolling
HAVARD D.	Effect of ice and Snow on the Dynamics of Transmission Line Cables Part I: Aeolian Vibration, Wake-Induced Oscillation and Galloping Motions
