

# Articles Index / Liste des articles

A New Attempt to Estimate Wet Snow Accretion on Overhead Lines  
A Novel Approach to the Combined Ice and Wind  
A Study on Freezing of Supercooled Water Droplet Impacting on Solid Surfaces  
A Theoretical Model for Measuring Stress Induced by a Vibrating load at Ice/Material Interface  
Amirkabir University of Technology Part II: Field Data on Conductor Galloping, Ice Shedding, and Bundle Rolling  
An Approach for Quantifying Structural Reliability of Overhead Structures and Its Application in Assessing Risk of Transmission Lines  
An Investigation of Sea Spray Icing and Deicing on Membrane Structures  
Atmospheric Icing Measurements in Fairbanks, Alaska  
Automated Wind-Icing Monitoring System  
Behaviour and Modeling of Cup Anemometers under Icing Conditions  
Characterization of Icing Events Based on Statistical Analysis of Field Data  
Collecting and Using Weather Data for the Design of Overhead Lines According to IEC 60826  
Comparison of Two Rime-Models Against an Observed Event in France  
COST Action 727: Measuring and Forecasting Atmospheric Icing on Structures  
Damageability of Overhead Lines During Ice Storms in Ukraine  
Deicing of Medium Voltage Power Transmission Lines by Joule Heating Method  
De-icing/Anti-icing Techniques for Power Lines: Current Methods and Future Direction  
Demonstration of the Feasibility of a New Mechanical Method of Cable De-Icing  
Design Winds During Ice Storm as a Function of Direction For Transmission Lines  
Determination of Current Required to De-Ice Transmission Lines Conductors  
Development of a Portable De-Icing Device for Overhead Ground Wires  
Diminishing the Impact of Meteorological Factors on Overhead Electrical Lines  
Dynamics of Streamer on Ice Surfaces  
Effect of ice and Snow on the Dynamics of Transmission Line Cables Part I: Aeolian Vibration, Wake-Induced Oscillation and Galloping Motions  
Effects of Wind Speed on the Accumulation Rate of Pollution on Outdoor Insulators under Winter Conditions  
Electrical Behavior of Snow Accumulated on a Post Insulator under AC High Voltage  
Estimating Marine Icing on Offshore Structures using RIGICE04  
Factors Affecting the Breakdown of Air Gap Between a Discharge and Ice-Plane or Wet-Plane Surfaces  
Fifty Years of Progress in Modelling the Accumulation of Atmospheric Ice on Power Network Equipment  
Flashover Performance of a T-Shaped Circuit Breaker Under Snow Conditions  
Flashover Performance of Station Post Insulators under Icing Conditions based on Electric Field Distribution  
Full-Scale 3D Numerical and Laboratory Simulations of Glaze Ice Accretion on a Non-Energized Station Post Insulator  
Hydrophobicity of Fluoroalkylsilane and Alkylsilane-Grafted Surfaces

Hydro-Québec TransÉnergie Line Conductor De-Icing Techniques

Hydro-Québec-TransÉnergie's Lévis Substation De-Icing Project

Ice Shedding of 200 m-Long Artificially Iced Overhead Cables at an Outdoor Test Site

Icephobic Material Centrifuge Adhesion Test

Icing and the Humidity of Air

Influence of Air-Gap Length and Position on the Flashover Performance of Ice-Covered Insulators under Switching Overvoltage

Insulation Properties of Long Rod and Line Post Insulators for 33 kV Transmission Line in Wet-Snow Storm on January 2004

Laboratory Measurements of Turbulence in an Icing Wind Tunnel using a Hot-Wire Anemometer

Local Influences on Occurrences of Freezing Rain and Precipitation Icing in Japan

Modeling a Water Flow on an Icing Surface

Modeling the Dynamics of Overhead Cables with Ice

Modern Meteorology and Atmospheric Icing

NRC Marine Icing Database

Observation of Capped Snow Accumulated over 66kV Polymer-Insulator Strings

On-Load Network De-icer for HV Transmission Lines

Performance Aspects of Lévis Substation DC De-Icing Project

Potential and E-Field Calculation Along an Ice-Covered Composite Insulator with Finite Element Method

Power Line Conductor Icing Prevention by the Joule Effect: Parametric Analysis and Energy Requirements

Prediction of the Flashover Performance of Ice-Covered Insulators

Process and Modeling of AC Arc Development on an Ice Surface

Quasi-steady Aerodynamic Data for Moderate Transition Icing of a Single Conductor

Rate of Ice Accumulation During Ice Storms

Snow Accretion on Overhead Wires

Temporal and Frequency Study of the Evolution of the Waveform of the Leakage Current of the Ice-Covered Insulators

Tests on Adjustment Laws of Wet Snow and Rime Loads in France

Texture and Fabric Characteristics of Atmospheric Ice Deposits on Overhead Power Lines

The Mesoscale Structure of the 1998 Ice Storm and Probability of Occurrence of Similar Ice Storms

The Role of Droplet Collision, Evaporation and Gravitational Settling in the Modeling of Two-Phase Flows under Icing Conditions

Theoretical Assessment of Ice Loading of Cables as a Function of their Torsional Stiffness

Three-dimensional Morphogenetic Model of Ice Accretion on a Non-rotating Cylinder

Tower Head Modification with V-Insulators Strings to Prevent Inter-Span Phase Contacts During Snow Shedding Effects

T-Return Period Values of Meteorological Design Parameters

Using Steam to De-Ice Energized Substation Disconnect Switch

Validation of Ice Loads Predicted From Meteorological Models

Winter Precipitation Types and Icing at the Surface
